

JobMaps: Product Requirements Document

Overview

- **Product Status:** In Progress
- **Product Target Release Date:** 08-31-2021
- **Document Status:** In Progress
- **Document Author:** Sayma Khan
- **Product Stakeholders:**

Area	Name
Product	Sayma Khan
Data Science	Adshayan Balendra & Jaishree Balamurugan
Back-end Development	Adshayan Balendra & Avi Patel
Front-end Development	Avi Patel & Jaishree Balamurugan & Sayma Khan
UX	Jaishree Balamurugan & Sayma Khan

Objective

The goal is to **simplify the job searching process** for students by:

1. Enabling users to easily track their job applications, interviews, and offers.
2. Providing analytical data and resources for users so they can optimize their chances of receiving job offers.

Target Audience

Undergraduate students pursuing STEM internships.

Background and Strategic Fit

When seeking job opportunities, students often struggle to manage all of their applications. Tracking the status of every application can become tedious and hectic. Moreover, students who are new to the application process typically need guidance to improve their resumes, cover letters, technical skills, and interview readiness. JobMaps allows users to maintain all of their applications with an intuitive user interface. Additionally, JobMaps provides analytical data based on each user's performance and curates resources for them to strengthen their skills and ultimately increase their chances of receiving a job offer.

Success Metrics

<i>Goal</i>	<i>Metric</i>
Intuitive user experience	Increased customer satisfaction score
Product works correctly	No bug/issue complaints (any bugs reported are fixed ASAP)
Help user manage applications	Increased positive feedback regarding ease of tracking applications
Help user improve quality of resume	Increased number of interviews
Help user improve interview skills	Increased number of offers

Assumptions

- Users will principally be using product (application) on desktop/laptop. Minority of users will use application on mobile devices.
